

How does it work?

• **Stage 1: PuraSorb Media** – Municipally treated water passes through this granular media, reducing sediments, dirt and debris down to 5 microns.

• **Stage 2: Absorption Media** – Water then passes through this media, reducing bad odors, tastes and Volatile Organic Compounds (VOC's). VOC's include Chlorine, Pesticides, Herbicides, Trihalomethanes (THM's), MTBE and other solvents.

• **Stage 3: Oxidation Reduction Media** – Water passes through this media (which controls microorganisms) reducing Chlorine, heavy metals, and improves performance, while extending the life of the system. Certified by NSF/ANSI 42 and 61, this patented media has been approved for drinking water system components in order to ensure quality, and performance.

• **Stage 4: AgiCell™ Water Conditioners** – These free moving scale inhibitors are proprietary and revolutionary designed conditioners, which agitate the Absorption Media and create a higher rate of turbidity during backwashing, for a cleaner more efficient filtration process. AgiCell™ Water Conditioners also de-crystallize the molecular structure of hardness minerals (Calcium Bicarbonate and Magnesium Bicarbonate) and turn them into a non-adhering powder form. These conditioners prevent mineral build-up and remove existing build-up in your plumbing and appliances.

• **Stage 5: Anti-Scaling Media** – Water passes through the patented Anti-Scaling Media which acts as a scale inhibitor. This media is certified under ANSI/NSF Standard 42 and 60 for aesthetic and health effects. The media can sequester hardness, inhibit precipitation and the formation of deposits (Calcium bicarbonate and Magnesium bicarbonate).

• **Stage 6: Quartz Media** – Water passing through the bed of Quartz Media ensures a higher flow rate throughout the system.

You and your family deserve the best and can now begin experiencing the luxury, and convenience of having filtered, conditioned water at every faucet throughout your entire home. Your water will smell better, taste better, feel gentler on your skin, and provide you with peace of mind that you are washing, bathing, and drinking cleaner, healthier, more delicious water.

PuraFlow™ 5000 Water Conditioner

**1 – 2 Adults and/or
800 – 3000 Sq. Ft.**

- User-Friendly Electronic Meter Control Valve
- High Flow Rate Capacity Up To 25 GPM
- Energy Efficient Electronics
- Automatic Backwashing and Self Maintaining
- Six Stages of a Proprietary Blend of Filtering and Conditioning Medias
- AgiCell™ Water Conditioners
- Protective Stainless Steel Jacket
- Built-In Service Bypass Valve
- ¾", 1", 1¼" or 1½" Brass Connections
- Compact 9" Width x 54" Height (1 Cubic Foot) 100 lbs.
- 5-Year Limited Warranty
- Made in the U.S.A.

PuraFlow™ 6000 Water Conditioner

**3 – 4 Adults and/or
3100 – 4900 Sq. Ft.**

- User-Friendly Electronic Meter Control Valve
- High Flow Rate Capacity Up To 30 GPM
- Energy Efficient Electronics
- Automatic Backwashing and Self Maintaining
- Six Stages of a Proprietary Blend of Filtering and Conditioning Medias
- AgiCell™ Water Conditioners
- Protective Stainless Steel Jacket
- Built-In Service Bypass Valve
- ¾", 1", 1¼" or 1½" Brass Connections
- Compact 10" Width x 60" Height (1.5 Cubic Feet) 125 lbs.
- 5-Year Limited Warranty
- Made in the U.S.A.

PuraFlow™ 7000 Water Conditioner

**5+ Adults and/or
5000+ Sq. Ft.**

- User-Friendly Electronic Meter Control Valve
- High Flow Rate Capacity Up To 35 GPM
- Energy Efficient Electronics
- Automatic Backwashing and Self Maintaining
- Six Stages of a Proprietary Blend of Filtering and Conditioning Medias
- AgiCell™ Water Conditioners
- Protective Stainless Steel Jacket
- Built-In Service Bypass Valve
- ¾", 1", 1¼" or 1½" Brass Connections
- Compact 12" Width x 58" Height (2 Cubic Feet) 150 lbs.
- 5-Year Limited Warranty
- Made in the U.S.A.
